Seattle, WA

OBJECTIVE

Over the past year I have dedicated myself to transitioning from a career as a video producer to front-end developer. My goal is to leverage my aesthetic sense, attention to detail and passion for creating to build exciting and interesting web experiences.

EXPERIENCE

Front End Developer

- Created small business sites with HTML, CSS/SCSS, JS, React and GraphQL.
- Created an arbitrage trading calculator that uses historical stock data through APIs to calculate buy/sell prices.
- Continual use of Git/GitHub

Combat Photographer **United States Marine Corps**

- Captured video and still images for documentation, reconnaissance, and educational purposes.

Chief Photographer **Sarasota Herald-Tribune/SNN6**

- Shot and edited daily feature, sports, spot and general news stories.
- Supervised production staff including editors, photographers, and associate producers.

Online Video Producer/Manager **The Associated Press**

- Managed the production team responsible for AP's entertainment, business, and technology content.
- Developed, designed, and launched AP's Lifestyles video service.

Founder **Seven Borders Media**

- Ran a production company that produced commercials and corporate communication videos.

Operations Manager **KCTS9**

- Led team of producers, reporters, photographers, editors and studio crew in the creation of weekly half-hour news program under tight deadlines with limited resources.

Video Producer **Independent**

- Manage video projects from concept development through final delivery (pre-production, production and post-production).

MOTTO

"Improvise, adapt and overcome."

SKILLS

HTML5
CSS
JavaScript
